

English Language Program

Key Performance Indicators and Benchmarking

Review Report

Content of the Report

- 1. List of the KPIs for the English Language Program
- 2. The KPIs Achievements for the English Language Program Compared With the External Benchmarks
- 3. Program KPIs Assessment, Analysis and Comparison with the External Benchmarks
- 4. List of Recommendations Based on the Analysis of KPIs and Benchmarks

2018/2019

1. List of the KPIs

- **KPI-P-01:** Percentage of achieved indicators of the program operational plan objectives
- KPI-P-02: Students' Evaluation of quality of learning experience in the program
- KPI-P-03: Students' evaluation of the quality of the courses
- **KPI-P-04:** Completion rate
- KPI-P-05: First-year students retention rate
- KPI-P-06: Students' performance in the professional and/or national examinations
- **KPI-P-07:** Graduates' employability and enrolment in postgraduate programs
- **KPI-P-08:** Average number of students in the class
- KPI-P-09: Employers' evaluation of the program graduate's proficiency
- **KPI-P-10:** Students' satisfaction with the offered services
- **KPI-P-11:** Ratio of students to teaching staff
- **KPI-P-12:** Percentage of teaching staff distribution
- **KPI-P-13:** Proportion of teaching staff leaving the program
- **KPI-P-14:** Percentage of publications of faculty members
- KPI-P-15: Rate of published research per faculty member
- KPI-P-16: Citations rate in refereed journals per faculty member
- **KPI-P-17:** Satisfaction of beneficiaries with the learning resources

2. The KPI Achievements for the English Language Program Compared with Internal and External Benchmarks

| KPI# | List of Approved KPIs | KPI Actual Benchmark | KPI Target Benchmark | KPI Internal Benchmark (2018) | KPI External Benchmark (Effat University) | KPI New Target Benchmark |
|----------|--|---|-------------------------|-------------------------------------|---|--------------------------------|
| KPI-P-01 | Percentage of achieved indicators of the program operational plan objectives | 20% | 30% | NA | 65% | 30% |
| KPI-P-02 | Students' Evaluation of quality of learning experience in the program | Males= 4.16 Females= 3.78 Average= 3.97 | 4.00 | 3.80 | 4.05 | 4.00 |
| KPI-P-03 | Students' evaluation of the quality of the courses | Males= 4.30 Females= 3.96 Average= 4.13 | 4.20 | 3.90 | 4.50 | 4.20 |
| KPI-P-04 | Completion rate | Males= 66% Females= 79.23% | Males= 70% Females= 70% | Males= 40.7% Females= 51.2% | 100% | 75% |
| KPI-P-05 | First-year students retention rate | Average= 72.61% Males=54.03% Females=49.47% Average=51.75% | Average= 70% 60% | Average= 45% 39% | 100% | 60% |
| KPI-P-06 | Students' performance in the professional and/or national examinations | 39% | 60% | Not Available | 65% | 50% |
| KPI-P-07 | Graduates' employability | Males= 25.36% Females=22.84% Average=24.1% | 35% | 20% | 55% | 35% |
| | and enrolment in postgraduate programs | Males=3.3% Females=3.1% Average=3.2% | 5% | 2.6% | 7% | 5% |
| KPI-P-08 | Average number of students in the class | Males=30 Females=30 Average=30 | 30 | 30 | 25 | 30 |

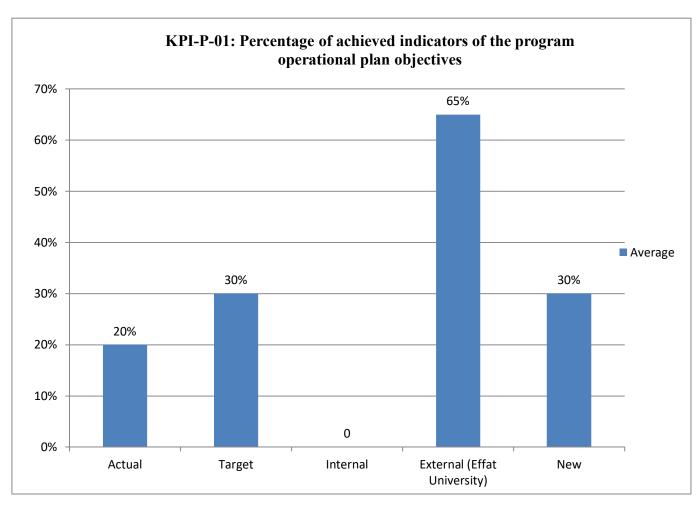

| KPI-P-09 | Employers' evaluation of the program graduate's | 3.54 | 3.70 | 3.58 | 4.04 | 4.00 |
|----------|---|--|-------------|--------------|--------------|--------------|
| | proficiency | | | | | |

3. The KPI Achievements for the English Language Program Compared with the External Benchmarks

The following text illustrates the analysis of the KPIS of English language program and the comparison with the external benchmarks

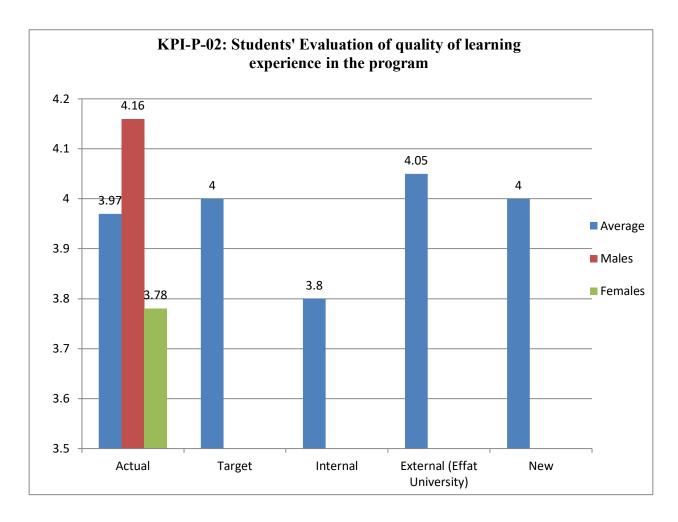

The percentage of the achieved indicators of the program operational plan objectives was (20%), which is a bit lower than the target benchmark (30%). This indicator has not been compared internally as the operational plan of the program has recently been designed. Externally, English program in Effat University achieved (65%) of the operational plan objectives and this indicates the English program in King Khalid University still lagging when compared externally,

Strengths

- ✓ This indicator was measured for the first time and it gives the opportunity to show the progress of achieving the program operational plan objectives.
- ✓ This indicator shows an acceptable rate of achieving the program operational plan objectives (20%) and it is hoped to continue this achievement.

- ✓ Quality team members should keep working to achieve the target benchmark of this indicator.
- ✓ It is recommended to form committees for each objective of the operational plan. This would help in achieving the objectives with a quality outcome.

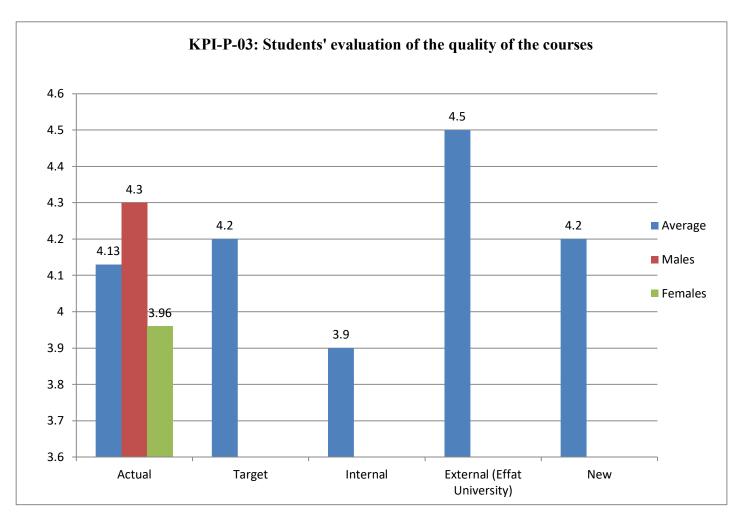

The average mean score obtained for this indicator is (3.97), which is a bit lower than the target benchmark (4.00). The males reported higher mean score (4.16) concerning this indicator when in comparison with females (3.78). This indicator got higher mean score when compare it internally (3.80), while it achieved a lower mean score compared to English program at Effat University (4.05).

- ✓ The average mean score of this indicator shows that it achieved its target.
- ✓ The actual benchmark of this indicator shows better progress compared to the previous year.

- ✓ Improve the level of teaching courses offered at the program through conducting training workshops for effective language teaching strategies.
- ✓ Establishment of different clubs to provide scientific and social services for the students.

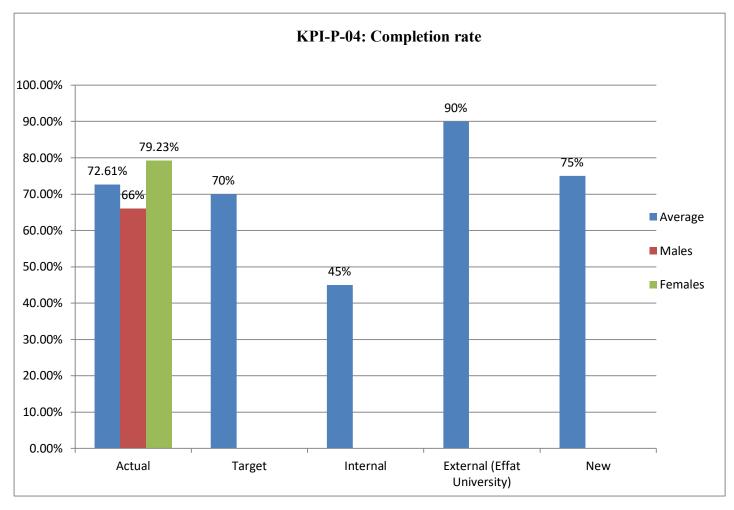

The average mean score obtained for this indicator is (4.13), which is a bit lower than the target benchmark (4.20). it is obvious from the chart above that the males got higher score (4.30) in comparison to their females counterparts (3.96). This indicator surpassed the internal benchmark (3.90), while it stands far from the external benchmark (Effat University) (4.50).

- ✓ The average mean score of this indicator shows that it achieved its target.
- ✓ The actual benchmark of this indicator shows better progress compared to the previous year.
- ✓ The students showed satisfaction of the quality of courses offered in the program.

- ✓ Improve the level of teaching the courses of English language.
- ✓ Attracting more qualified faculty members.

The rate of completion was (72.61%), the completion rate in the male campus was (66%), while it was (79.23%) in the female campus. The rate of completion in the female campus exceeds the target benchmark which was (70%), while the completion rate in the male campus did not reach the target benchmark (70%). It is obvious that a considerable progress has been achieved when comparing this rate internally, the completion rate of the previous year was (45%), but there is a big difference between the completion rate in the English program in King Khalid University and the English program in Effat University (90%). Based on these results, a new target benchmark has been set to be (75%).

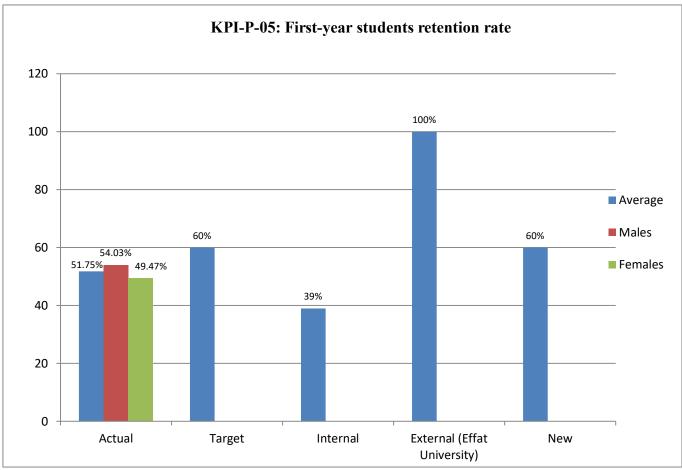

Strength

- ✓ There is an increase in the completion rate compared to the previous year.
- ✓ The completion in the female campus achieved the targeted completion rate.

Priorities for Improvement

✓ There should be periodic meetings with the students in order to explore the difficulties and obstacles facing them to complete the program in the minimum period.

The actual benchmark indicates improvement in the retention rate of students which was (51.75%). The percentage of male students who successfully completed the first year was higher (54.03%) than female students (49.47%). The internal benchmark of this indicator was (39%), while the external comparison showed that the English program at Effat University surpassed the English program at King Khalid University with full percentage (100%).

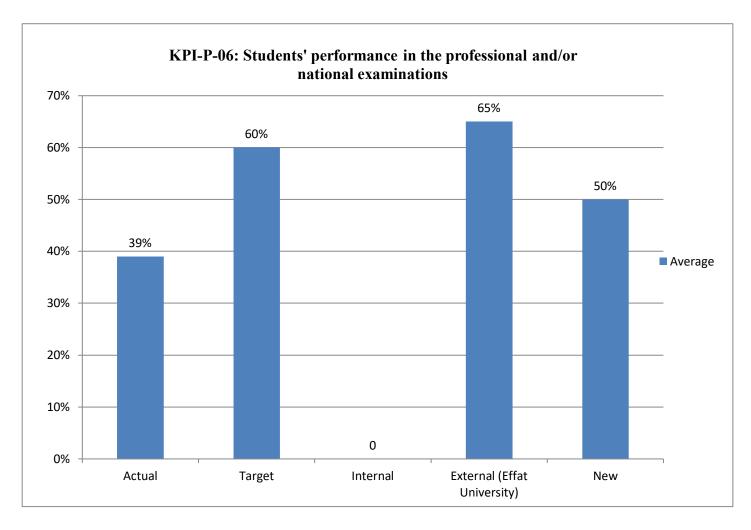

Strengths

✓ First year students' retention rate raised from (39%) to (54.03%) in the male campus and (49.47%) in the female campus. It is hoped to reach the targeted benchmark soon.

✓ It is recommended to closely study the detailed results. It is worth mentioning that there is a need to regularly review the admission requirements to guarantee that admitted students have the required basic knowledge and skills for the program and also to improve contents and quality of the orientation programs for new students to increase the retention rate of students.

The results of this indicator showed that the actual benchmark was (39%) which is much lower than the target benchmark (60%). The students' performance in national examinations was much lower compared to the English program in Effat University (65%). The new target benchmark set for this indicator is (50%).

Strengths

- ✓ The students are now familiar with these kinds of tests.
- ✓ These results give the opportunities for the administrative to design a good plan to improve the students' achievement in those examinations.

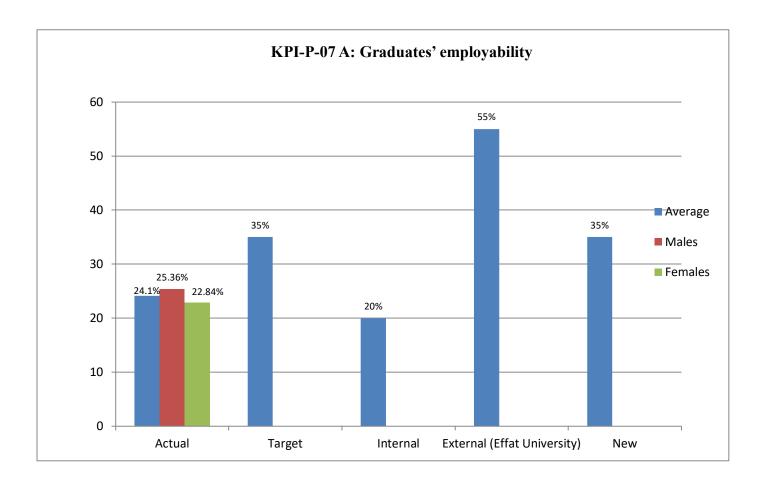

Priorities for Improvement

✓ To conduct similar test in the program to train students on these kinds of tests.

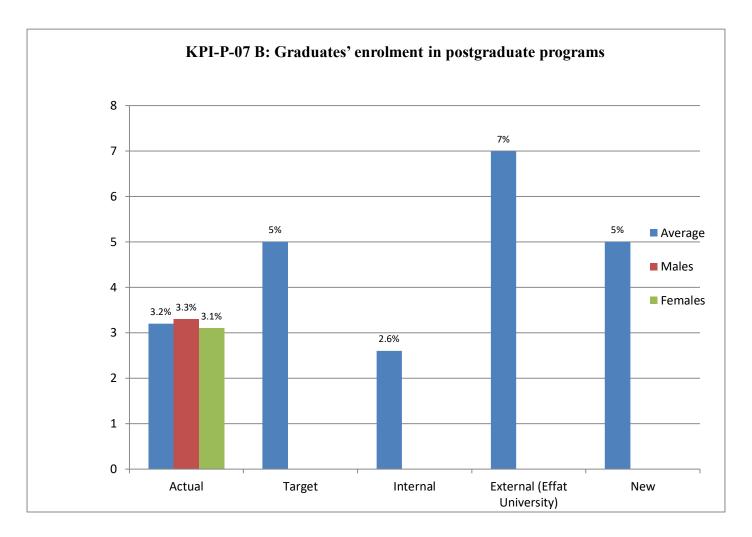

- ✓ To create question banks would be much helpful to students.
- ✓ To train students about test-taking strategies in order to improve their performance in such tests.

The results of this indicator revealed that the proportion of students who were employed was (24.1%). Male students were more likely to get jobs with a percentage (25.36%), while the percentage among female students was (22.84%), these percentages were below the target benchmark (35%). Also, the proportion of students who enrolled in further study was (3.2%), which is also below the target benchmark (5%). The percentage of male students who enrolled in further studies was (3.2%) almost the same percentage found among female students (3.1%). The actual benchmark was a bit better compared to the previous year (2.6%), while it was a bit lower when compared it externally with Effat University (5%). The new target benchmark for this indicator was set to be (5%).

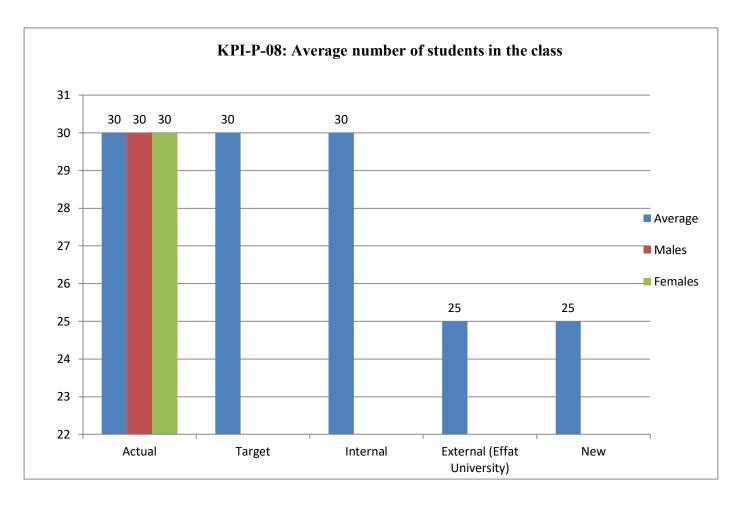

Strengths

✓ The rates showed an improvement in both graduates employability and their enrolment in postgraduate studies.

- ✓ Establish a new alumni unit to support them and follow up their activities.
- ✓ Support the graduated student with some specialized high-level training courses that helps to raise the employment opportunities for our graduated students.
- ✓ Work to set up partnerships with the business sector.
- ✓ Work to organize various events such as Career Day so that our students explore different opportunities.

The average number of students in the class in both males and females' campuses was (30), which is considered an accepted average and it also achieved the target benchmark. The internal benchmark of this indicator was (30), while the external benchmark with Effat University was (25). The program intends to decrease the average number of students in the class to be (25).

Strengths

✓ This indicator achieved its target, and it is hoped to keep the same rate or even less.

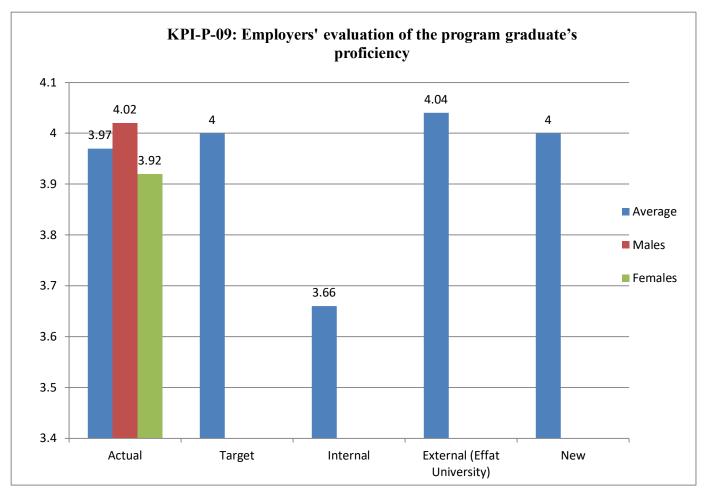

Priorities for Improvement

✓ To keep the average number of the students the same or trying to decrease the average number to be (25)

✓ Recruiting new faculty members and having new classrooms would help in achieving this target.

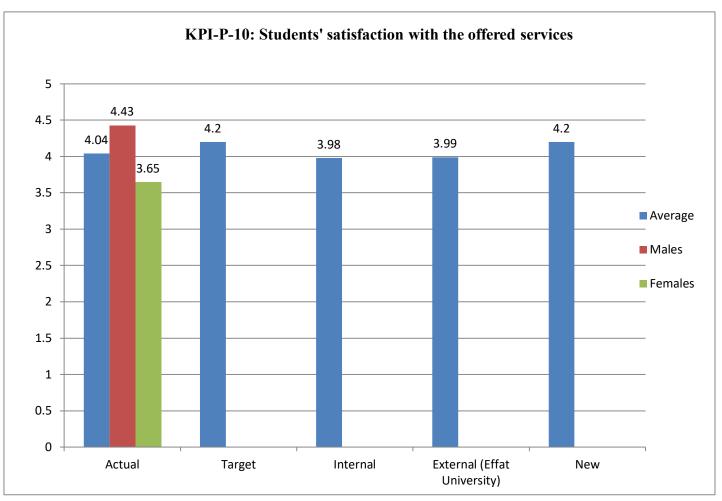

The average mean score of this indicator on a five-point Likert scale was (3.97) and it is higher than the previous value (3.66), but slightly lower than the target one (4.00). Male students reported more satisfaction concerning this indicator with a score (4.02) compared to female students (3.92). This proportion is lower than the benchmarking of Effat University (4.04); the new target benchmark for this indicator is set to be (4.00).

- ✓ A good number of employers were surveyed to get information about this indicator.
- ✓ The graduate proficiency for males achieved its target and the average for this indicator was close to the target benchmark.
- ✓ There is an improvement in this indicator compared to the previous year.

- ✓ To keep the periodic meetings with the advisory committee that contains people from the local community.
- ✓ Get information from the advisory committee about their expectations from the graduates of English program in King Khalid University.
- ✓ To conduct more training sessions and workshops for students to improve their skills and competencies.

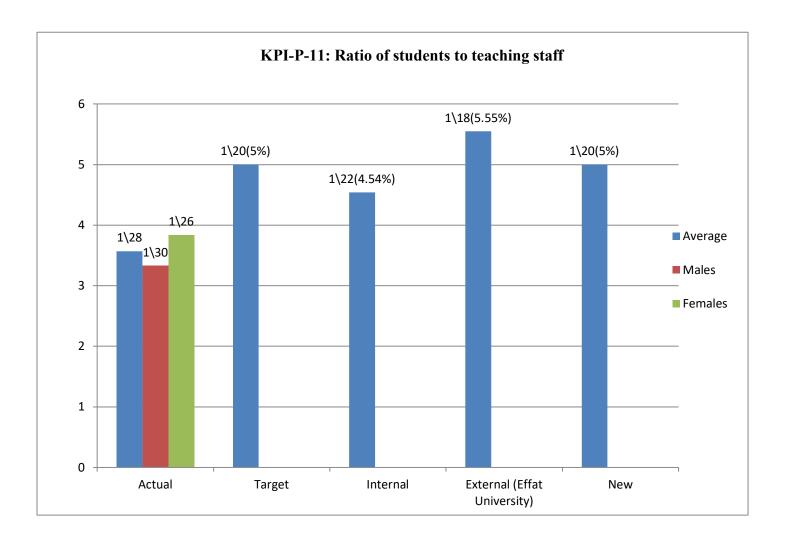

This indicator got higher value (4.04) compared to the previous one (3.98). Also, it was higher than the value obtained from the English program at Effat University (3.99). A new value was set for the target benchmark (4.20). However, there was a big difference between males and females with regard to their satisfaction with the offered services (males=4.43, females=3.65).

- ✓ The mean score obtained from the male campus shows that it achieved the target benchmark.
- ✓ The average mean score was better compared to the previous year.
- ✓ The actual benchmark exceeded the English program in Effat University.

✓ A closer look at the detailed data and results is recommended to detect areas of dissatisfaction and possible actions for improvement at the program level.

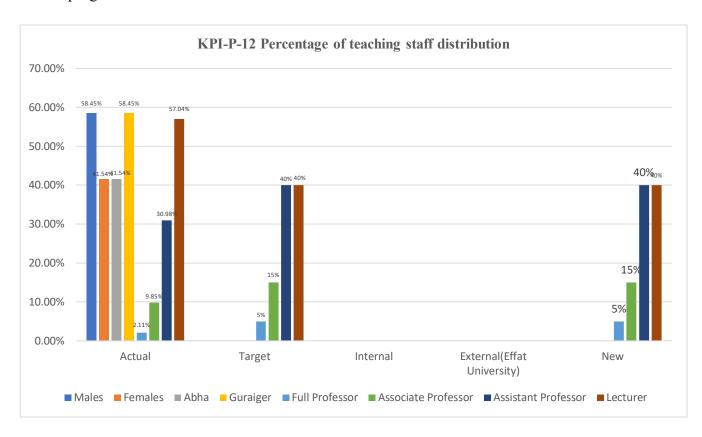

The number of teaching staff include tutors, lecturers, and assistant, associate and full professors whether involved with teaching, research or both teaching and research. The overall ratio of students to teaching staff was 1/28. The ratio of female students to teaching staff 1/28 was more satisfied in comparison with the same ration at the male campus 1/30. It is clear that the actual benchmarks do not meet the target benchmarks, as well as it is lower than external benchmarks (Effat University).

✓ It is clear that the program suffers from high ratio of students to teaching staff. Our recommendation is to hire a high more teaching staff for both sections (females and males) with verified doctoral qualifications as was planned in the strategic plan for the program.

This indicator shows the distribution of teaching staff according to gender, location, and academic rank. The results show that (58.45%) of the teaching staff were males, while (41.54%) were females. Concerning the location, (41.54%) of the teaching staff were in Abha campus, while (58.45%) were in the main campus (Guraiger). The percentage of full professors was (2.11%), Associate Professor (9.85%), Assistant Professor (30.98%), and lecturers (57.04%).

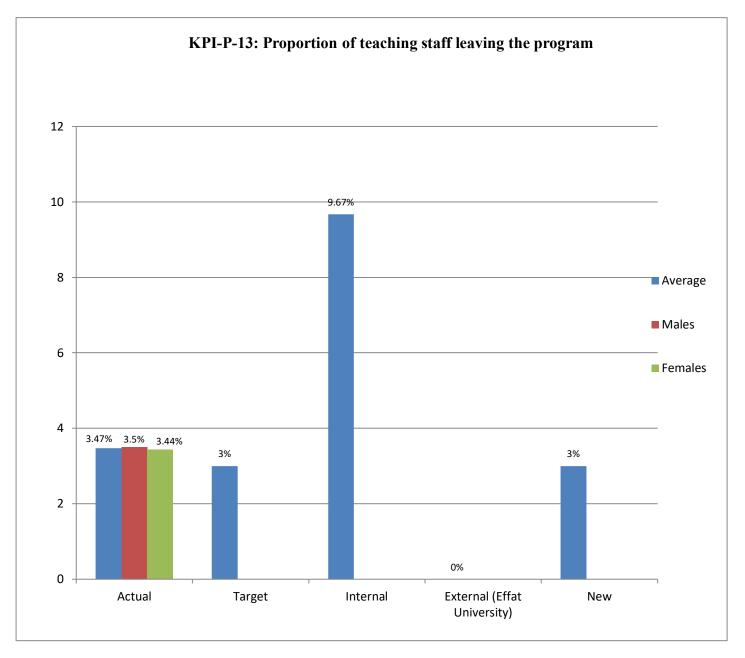

Strengths

✓ The results showed a good percentage for PhD holders.

- ✓ There is a need to increase the percentage of full professors and associate professors since the college contains different postgraduate programs.
- ✓ There is also a need to decrease the number of lecturers or transfer them to English language center since only Assistant, Associate, and Full Professors are accounted for quality assurance purpose.

Proportion of teaching staff leaving the department in the past year for reasons other than age retirement rated (3.47%), which is low value, and it is lower than the internal benchmark (9.67%). This reveals that English program at KKU achieved a higher level of employment stability for faculty members. The proportion of leaving teaching staff was a bit higher at the males' campus (3.5%) compared to those at the female campus (3.44%).

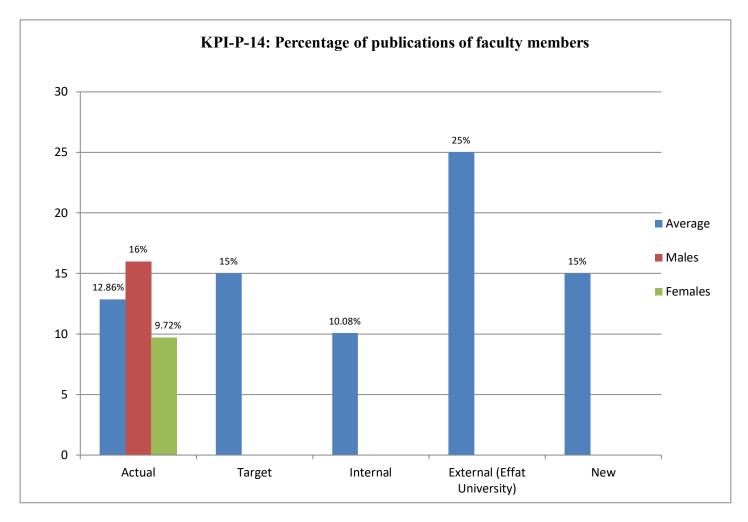

Strengths

- ✓ There was a great decline of the faculty members leaving the program compared to the previous year.
- ✓ The average mean score for this indicator was close to reach its target.

- ✓ Keeping on teaching staff, if there are no reasons to leave because this satisfies the homogeneity and adaptation in the work.
- ✓ Improve the support for new and existing faculty members through establishment of better tenure, and rewarding system.

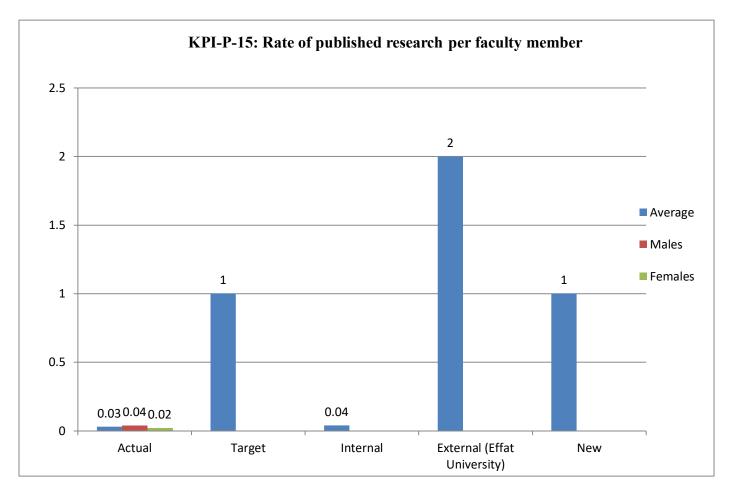

The percentage of publications of faculty members was (12.86%), which shows improvement compared to the previous year (10.08%). However, this value is still far from the proportion recorded at the English program in Effat University (25%). Male teaching staff were more active regarding research publication than female teaching staff (males= 16%, females 9.72%).

- ✓ The average percentage of this indicator showed improvement compared to the previous year.
- ✓ This indicator achieved its targeted percentage.

- ✓ Establishment of research lab and research groups.
- ✓ Establishment for strategic plan for research work in the program.
- ✓ Reduce the teaching load for faculty members to improve their performance in research.

The number of published research papers past year per faculty member was (.03), which is very low value and even lower than the internal benchmark (.04). This could be attributed to the new rules issued by the university concerning this point. The rate of published research papers among males and females was almost the same (males=0.04, females=0.02). The actual benchmark of this indicator was lower compared with the faculty members in Effat University where the rate of published research papers was (2). The new target benchmark set for this indicator is (1).

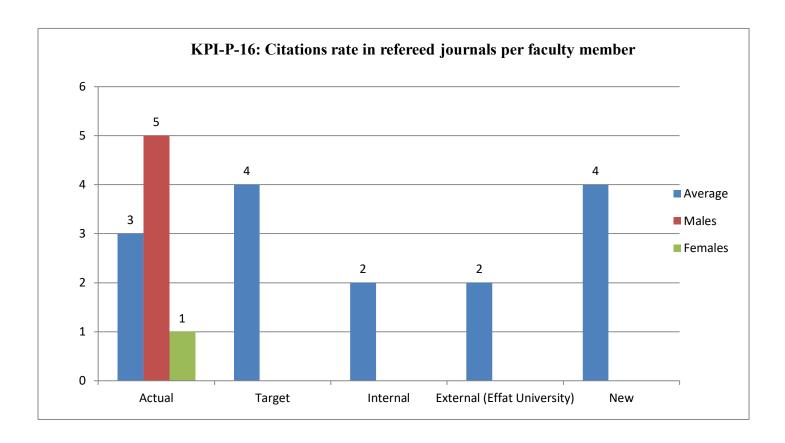

Strengths

✓ The rate of published research per faculty member in the male campus was the same compared to the previous year but it is hoped to get some improvement to reach the targeted rate.

- ✓ To design improving plan to improve the performance indicator in this respect.
- ✓ To enhance the culture and skills of active participation in the scientific conferences among faculty members.
- ✓ To review the rules and conditions pertaining research publication set by the university.

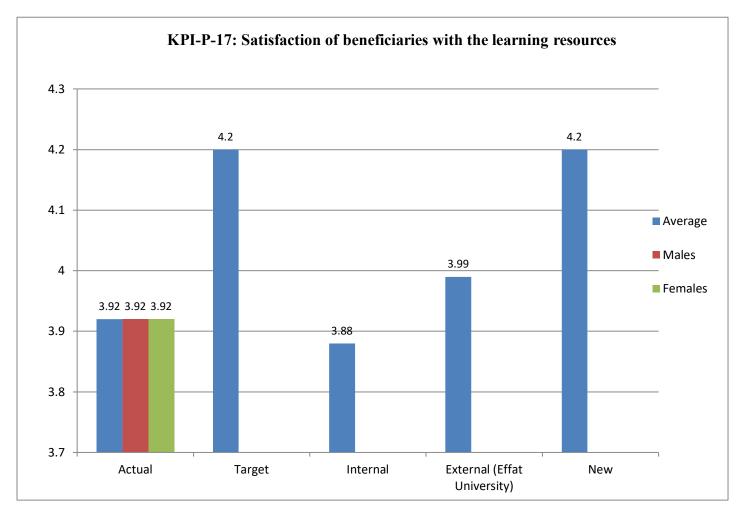

The number of citations in refereed publications in the previous year per full time teaching staff was 3 citations which are considered very low value, but it surpassed the internal value and the external value. The number of citations of male faculty was much higher than those of females (males=5 citations, females= 1 citation).

- ✓ There is increment of the citation rate per faculty member compared to the previous year.
- ✓ The rate of citations per faculty member exceeded the program in Effat University.

✓ It is recommended to enhancing the culture and skills of international publishing of scientific research in ISI scientific journals, among faculty members at the program. This will result in increasing the number of citations per faculty member.

The mean score of this value was (3.92) which is slightly higher compared to the previous value (3.88). Also, it was slightly lower than the value obtained from the English program at Effat University (3.99). A new value was set for the target benchmark (4.20). Interestingly, the mean scores among male and female students were equal in this indicator (3.92).

- ✓ The students reported a good rate of satisfaction with the learning sources.
- ✓ The average mean score of this indicator showed more satisfaction of the learning resources compared to the previous year.

✓ Interestingly, the rate of this indicator was the same in both males and females' campus.

This shows equal provision of learning resources for both campuses.

- ✓ The detailed report should be sent to the deanship of E-Learning to set their improvement plan after detecting the weakness points pertaining this indicator.
- ✓ To conduct questionnaires to administer to students in order to explore their needs with regard to learning resources.
